Hardwood Genomics Project

<https://beta.hardwoodgenomics.org/>

Comparative Genomics of Environmental Stress Responses in North American Hardwoods

- Started in 2011
- Housing genetic and genomic resources for hardwood tree species
- Increasingly devastating forest threats: diseases, invasive pests and climate change

Expanding HWG database

- New data and new interfaces
 - Controlled vocabularies
 - Genetic markers and maps, phenotype data
 - Search and expression visualization interfaces
- Tripal improvement
 - Tripal gateway
 - Cross site communication

Genetic and genomic resources in HWG

Tripal Elasticsearch: quick and easy access to data

Site Wide Search

Tripal Elasticsearch: quick and easy access to data

Site wide search (Advanced search)

- **Wildcard search** with `*`. Examples:
 - `genom* sequence` -> `genome` , `genomic` , `genomics` ...
 - `Lir*dron tulipifera` -> `Liriodendron tulipifera`
- **Fuzzy search**: When you don't know how to exactly spell your keywords, you use `fuzzy` search. `fuzzy` search allows you to search for similar words. You use the `~` at the end of your keyword for `fuzzy` search (`keyword~`). Examples:
 - `sequeence~` -> `sequence`
 - `Alnus rhmifolia~` -> `Alnus rhombifolia`
- **AND , OR , NOT operator and combination search**. Examples:
 - `"heat stress" AND ("Castanea mollissima" OR "green ash") NOT "heat shock"`

Data collections allow you to store sets of data for download or later use by other tools on this site. Typically data collections are created using search tools. The following data collections are available to you. Some files take time to generate before they can be downloaded.

Data Collections

Name	Description	Create Date	Downloads Formats	Actions
Fraxinus Excelsior mRNA		Mon, 01/01/2018 - 16:27	<ul style="list-style-type: none">Tab delimitedCSV (comma separated)Nucleotide FASTA	Delete

Cross site search

A screenshot of the HWG (Hardwood Genomics Project) website's "Cross Site Search" page. The page has a green header with the HWG logo and navigation links: Home, Trees, Genomic Data, Tools, About, and Contact. Below the header, the "Cross Site Search" title is displayed. A search bar contains the text "GO:0016049" and a "Search" button. A dropdown menu is open on the right side of the search bar, listing various search options: Expression, Visualization, Blast, Gene Search, Cross Site Gene Search (highlighted with a red box), Cross Site Search (highlighted with a red box), JBrowse, Tripal Galaxy, and Workflows. Below the search bar, it states "Found 32 results from 1 websites" and lists the results under the "HWG" heading.

Step 1: Instructions

Here you can submit an analysis for execution. This analysis makes use of several bioinformatics tools with each tool provided as a separate step in this workflow. As you move from step to step in the form you can alter tool settings to control how the tool performs. Some tools may not have settings or use output from tools that appeared as a previous step. Optional settings may be provided.

Execution of this workflow is supported by [Galaxy](#).

This workflow uses the following tools:

- Augustus 3.2.3
- tRNA and tmRNA 0.6
- NCBI BLAST+ blastp 0.2.01
