> xset
An "xcmsSet" object with 16 samples

Time range: 6.8-1528.4 seconds (0.1-25.5 m
Mass range: 53.0167-699.356 m/z
Peaks: 8941 (about 559 per sample)
Peak Groups: 0
Sample classes: ref, sample

Profile settings: method = bin
                  step = 0.1

Memory usage: 1.56 MB
> xset <- group(xset)
115 178 240 303 365 428 490 553 615 678

Our Solution

The screenshot displays the Galaxy / ABiMS web interface. The top navigation bar includes links for Analyze Data, Workflow, Shared Data, Visualization, Help, and User. A status bar on the right indicates 'Using 24%'. The left sidebar contains a 'Tools' section with a search bar and a list of ABiMS workflows, including 'Workflow RNA-seq de novo by ABiMS', 'Workflow RNA-seq with reference by ABiMS', and 'Workflow Metabolomic by ABiMS'. The main content area features an 'Online' status indicator, a list of updates for RNASeq and DESeq tools, and a 'History' panel on the right showing a workflow named 'XCMS 4 conds' with a file 'mzXML.copper_stress_4cond.ms.zip'. A large, semi-transparent box is overlaid on the right side of the interface, containing text about ergonomics, parameter completeness, modularity, data & workflow sharing, and user types.

**** The ms_zip input file ****

The input file to the metabolomic workflow is a zip file containing all your conditions as sub-directories, with 1 file per condition. You can upload this file to Galaxy using the "Get Data" tool.

What it does? The default method for processing LC/MS files is xcmsSet. It stores peak lists and provides methods for grouping and aligning those peaks.

Parameters

The default arguments for xcmsSet should work acceptably in most cases. However, there are a number of parameters that may need to be optimized for a particular

Data & workflows & tools sharing

- ▶ **Data:** Easy sharing of Galaxy histories, even between distant instances
- ▶ **Workflow:** Advanced users can share pre-configured workflows (eg. high or medium resolution MS)
- ▶ **Tools:** Galaxy tools and pipelines can be shared through Toolsheds
