Attend a free SACNAS
pre-conference
workshop

Software & Data Carpentry

Ever find yourself manually repeating coding tasks? Do you feel like there should be an easier way to go about doing **data analysis and visualization**? Join us for a **Software and Data Carpentry** session to learn how to efficiently work in the Unix shell for file manipulation and use Python in a sample workflow of data analysis from loading to visualization.

Data Platforms for Life Science

Want to do data analysis and don't know where to start? **CyVerse** and **Galaxy** are two widely used and freely available data analysis platforms for life science research. This workshop will cover both platforms and by the end of the day you'll know **how to use both to manage, integrate, analyze, and visualize your data**. The focus will be on interactive hands-on exercises with life science data.
