

Galaxy

Community Conference 2012

<http://galaxyproject.org/GCC2012>

Galaxy is an open, web-based platform for data intensive biomedical research that enables bioinformaticians and bench scientists alike to create, run, tune, and share bioinformatic analyses. GCC2012 aims to engage a community of developers, data producers, core facilities staff, and tool creators, all working towards addressing the challenges of “big data” biological research.

4/16 Abstract submissions due
